Look at the skeleton and muscle groups inside our body.
What do you notice?

1b Work in pairs. Read and check your guesses.

Our body is more than what we see when we look in the mirror. There are different parts that have different jobs. Each part works together so we can eat, sleep, sit in class and play with friends.

Our skeleton has main functions:
- To support the body. For example, without a backbone we would not be able to stay upright.
- To protect some of the vital organs of the body. For instance, the skull protects the brain; the ribcage protects the heart and lungs.
- To help the body move. Some bones in the skeleton are joined together and cannot move against each other. Most of the bones are joined to each other by flexible joints. Muscles are needed to move bones.

Bones, joints and muscles make up your musculoskeletal system. Together, they help us move and support an active lifestyle. Keeping your bones, joints and muscles healthy is important.

1c Look at the words in the cloud and label the skeleton.
1 _____ 2 _____ 3 _____ 4 _____ 5 _____ 6 _____

The most exciting moment of the opening ceremony is the lighting of the Olympic Flame, another symbol of the Olympic Games. Runners bring a torch from the valley of Olympia in Greece. Thousands of runners take part in the journey. The journey starts four weeks before the opening of the Games. At the opening ceremony, the final runner carries the torch to the stadium, and lights the new Olympic Flame. Then there is a very big song, dance and music show. 3b Read and check your ideas.

People all around the world enjoy drinking Coca-Cola. It is popular both in America and the world. Its story starts in the USA more than 100 years ago but its recipe was different from today. The name of Coca-Cola was the idea of Frank Robinson, the book-keeper of Dr. Pemberton. In fact, Frank Robinson created the first famous Coca-Cola logo. In its first year, Coke (a nickname for Coca-Cola) was not a success.

In 1887, Asa Candler bought the recipe from John Pemberton. With a lot of advertising and a good business plan Coca-Cola became one of the most popular drinks.

In 1892, a second Coca-Cola company appeared and this is the Coca-Cola Company that still stands today.

In fact, the first bottles of Coca-Cola appeared in 1894, and the first cans of Coca-Cola in 1955.

There were a lot of advertisements in many newspapers and magazines, on the posters and on many billboards on the roads. In addition, Coca-Cola also used radio.

Many people think that Coca-Cola gave the picture of Santa Clause as an old man in a red suit with a white beard.

Today, the Coca-Cola Company is still one of the largest advertisers in the world. It not only advertises in newspapers, radio, television, film and on the Internet, but also advertises sports and other events. During the 1970’s one of the radio programme produced a hit song “I like to teach the world to sing”.

3 Read and say which slogan you like most and why.

KitKat – Have a break, have a KitKat
Children in many countries love a lunch box KitKat. The adverts of “Have a Break...” can be seen in many magazines and on TV. They say how tasty it is and how easy it is to eat this bar. The KitKat’s slogan and its red and white colours are simple and easy to remember.

Skittles – “Taste the Rainbow”
Skittles have used their “Taste the Rainbow” since 1994. This simple slogan works because it shows the product. The sweets are of different colours of a rainbow.

Kelloggs Frosties – “They’re GR-R-R-reat”
Tony the Tiger has been the Frosties mascot since the very beginning. Children like how he says “They’re Gr-r-r-reat!”. This ad slogan shows to the people that breakfast can be delicious.

2 Are all ads good? Why? Why not?

1b Read and check your ideas.

Food Advertisements

Many food companies like McDonald’s, PepsiCo, Burger King and Pizza Hut are using advertisements mostly for children. Many health reports say that children buy more of their food when they watch ads about different types of food products on TV. This TV advertising makes the children eat more than they need. The result shows that 68% of children regularly eat unhealthy food because they watch ads on television. A lot of children in the USA have a bad habit of eating when they see ads for pizzas, burgers and French fries. There are less advertisements about children education and care than ads about sweet drinks and unhealthy food. This brings health problems and nothing else.

3 What is going to happen?
4 Why did they write the letter?

Dear Leader

We have seen the plan for a new advertising billboard outside the bank in Navbahor Street. We are writing to tell you we are against this plan. We already have some advertising billboards in our mahalla. They advertise things like chocolate, biscuits, drinks, mobile phones, restaurants and cafes. Children see the billboards and ask their parents to buy the things. The things are very expensive. Parents cannot buy the things and they feel sorry. Children learn bad habits. Please do not put up any new advertising billboards.

Yours sincerely

1b Report.

Welcome to Eco Park in Tashkent.
Here you will find information and view photos.

Ecopark is Tashkent’s first ecological park where people used ‘reduce, reuse, recycle’ ideas. It opened its doors in April 2018. Many things here are made of old car wheels, plastic bottles and metal pipes.

The Tashkent Ecopark is an interesting place for people to learn new ways to take care of nature in the place where people live and work. Adults and children like a big spider made of metal pipes, flowers made of colored packets and other things.

In the park we can do a lot of leisure activities. People do sport and play games here. In the art studios in the center of the Ecopark children can make figures and draw pictures with the help of well-known artists.

The Ecopark is a place for people who want to spend more time in the open air with friends and families. They learn to care for the nature in a busy city.

2a Work in pairs. Read and answer the questions.

1 Why is Tashkent’s Ecological Park unique? 2 What can you do there?
3 How do they reuse old things? 4 What can we learn there?

2b Work in pairs. Ask and answer.

2b Listen and complete the text.

The United Kingdom of Great Britain and Northern Ireland is located on the British Isles. The British Isles are separated from Europe by the English Channel. The British Isles are washed by the North Sea in the East and the Atlantic Ocean in the West. The territory of Great Britain is divided into four parts: England, Scotland, Wales and Northern Ireland. Geographical position of Great Britain is very good because the country lies on the crossways of the sea routes from Europe to other parts of the world.

2 How many parts is the UK divided into? 3 How many parts is the USA divided into? 5 What oceans are the British Isles washed by? 6 Why is geographical position of Great Britain good?

2a Work in pairs. Answer the questions.
1 What deserts do you know?
2 What do you know about life in deserts?
3 Is there any vegetation?
4 Do animals live in deserts?

2b Read and check your guesses.
A Deserts cover about one-fifth of the Earth. Deserts are regions where the rainfall is less than 250 mm a year. In some years there is no rain at all. Deserts do not have much vegetation because of dry climate. They are usually covered by sand and stones. There are hot and cold deserts. Hot deserts are in Australia, south Africa and the Middle East. They have a very high temperature in the summer, sometimes over 50 degrees C. The icy continent of Antarctica is an example of a cold desert.

3b Work in pairs. Say what people must do.

B The world’s largest desert is the Sahara. Many plants found in the Sahara live in the two-to-three week time after a good rain. In 2005 African countries with African Union and other international organizations started a new programme. They started planting a 15-kilometre “wall” of trees from the western to the eastern part of the continent to stop desertification.

C The animal life in Kalahari Desert is richer in the north than in the south. We can see there a lot of giraffes, zebras, elephants, buffalo, antelopes, lions, cheetahs, leopards, wild dogs, foxes, lizards, snakes and different birds.

At the other end was Rome. Each had something the other wanted. Rome had gold, silver and beautiful stones. China had silk, tea, and spices. The Silk Road was important because people not only changed things but also food, ideas and culture. The Romans wanted to find such a road for a long time because they wanted to have silk. The Natural History Museum in London opened in 1881. First it was a part of the British Museum. It is both a museum and the place where scientists work. It is a beautiful building. There are about 80 million things in the Museum and Darwin Centre. In 1905 the best known dinosaur’s skeleton appeared there. This dinosaur is called Dippy. This dinosaur is known as the biggest in the world. The skeleton is 26 metres long. There are other types of dinosaurs, especially the popular T rex. There are stuffed birds, with the extinct dodo bird. People can compare a little hummingbird’s egg with that of an elephant bird (now extinct), which is as big as a football. Every year the museum has new exhibitions, as well as some events like favourite “Wildlife Photographer of the Year” and butterfly house, ‘Sensational Butterflies’. You can visit the museum after hours including movie nights, monthly late openings and the chance to sleep at the Museum with Dinosaurs.
